Display the following content information on the home page.

1. “Transparency through timely, controlled and effective communication.”

Effectively communicating adverse events to a wide ranging audience requires thoughtful consideration to both the types of shared information and the targeted recipient. A consumer covets readily digestible information on the medicinal product they plan to or are currently taking. Alternatively, the researcher and medical professional have a broader mandate for actionable information.

RxEffects plans to deliver adverse event information to this broad community

1. Visualization

Communicating critical information in easy to consume pictorial or graphical format

2. Data Consolidation

Providing consolidated data sets from multiple sources enabling researchers and medical professionals to extract information for external examination

3. Analytics

Transform the reported data into meaning knowledge
